

CESSDA Workplan 2018 – Widening Activity task

Sub-task: Widening the services and support the currently non CESSDA ERIC members to offer them different services in according to the needs of the countries.

□ Target group:

- the non-CESSDA ERIC members and/or the countries where active data archive is not available with full services

□ Possible service support, examples

- creating and/or publish metadata
- publish data related materials or dataset using the Nesstar, Dataverse, other archiving/publishing systems
- storage files
- help researchers to using the archiving system or put data on it
- ...

Difficulties

- Currently we haven't got available information about the needs of the target group.
- A relatively wide target group is recommended after than it can be structured from the point of view of needs and CESSDA partnership.

The results can be

- Proposals of possible support from CESSDA, which should be based on actual availability of tools and knowledge within the CESSDA community
- Strategies of future developments.

The main activities in 2018 will be:

- 1, collect information about the needs
- 2, creating feasibility study (deliverable of the sub-task)
