# Support for Establishment of National/Regional Social Sciences Data Archives

FRAMEWORK PROGRAMME

**2012-2014**

**Partners:**

**CESSDA: FORS, ADP, UK, SND**

**New: Croatia, Bosna and Hercegovina, Serbia**

Starting point were CESSDA PPP recommendations:

Among them:.... **a member should..**

10. **provide mentor support** for CESSDA - ERIC Associate Members and their representative Service Providers to achieve Full Membership;
11. **provide member support** for countries with immature and fragile national infrastructures to help them build up needed competence later to be able to fulfil tasks as Associated or Full Member;

SERSCIDA was designed as a strategic project for supporting the **cooperation** and **exchange of knowledge** between the EU countries associated within the Council of European Social Sciences Data Archives (CESSDA) and the Western Balkan Countries (WBC) in the field of social science data archiving.

There were almost **no current practices** in archiving of social science data.

**FRAMEWORK PROGRAMME**

**SUPPORT FOR ESTABLISHMENT OF NATIONAL/REGIONAL SOCIAL SCIENCES DATA ARCHIVES**

SERSCIDA is designed as a strategic project for supporting the cooperation and exchange of knowledge between the EU countries associated within the Council of European Social Sciences Data Archives (CESSDA) and the Western Balkan Countries (WBC) in the field of social science data archiving. The project addresses the issues of potentials of usage of information-communication technologies for the benefits of scientific research and exchange of knowledge as laid down in the call for proposals topic. The project aims to produce tangible results and improve the capacities for exchange of knowledge and data collected through research in social sciences between the European countries and WBC involved.

All 3 countries were involved in DWB project as observers.

Some effort was made to contact statistical offices in the countries and invite them (NSI and DA) for the large DWB events.

SWISS NATIONAL SCIENCE FOUNDATION

# What is SEEDS?

SEEDS – South-Eastern European Data Services – is a Swiss-funded project aimed at helping to establish new data services for the social sciences in the countries of Albania, Croatia, Kosovo, Macedonia, Montenegro, and Serbia.

With the guidance of the long-established Swiss and Slovenian national data services (FORS and ADP), the project will extend the capacities of selected partner institutions, and contribute to developing knowledge and tools related to data service infrastructures.

SEEDS will bring partner institutions into the fold of an international movement and network to provide long-term benefits not only to the partner institutions, but more importantly to the respective national research communities by making more data available for secondary analyses.

**1.**

put partner research institutions on track to serve as national data services, serving their national research communities

**2.**

build and expand archiving capacities, know-how, and technical infrastructure

**3.**

promote the ideas of data sharing and secondary analyses in the partner countries

**4.**

prepare the new data services in South-Eastern European countries to become members of CESSDA – the Consortium of European Social Science Data Archives
