# Raziskovalna struktura OPERAS in slovensko nacionalno vozlišče

OPERAS je raziskovalna infrastruktura, ki podpira odprto znanstveno komuniciranje na področju družboslovja in humanistike (SSH) v Evropskem raziskovalnem prostoru (ERA). Njeno poslanstvo je usklajevanje in združevanje virov v Evropi za učinkovito zadovoljevanje potreb evropskih raziskovalcev po znanstvenem komuniciranju na področju SSH.

A nationwide recreational fishing survey in Sweden was used to estimate the benefits of recreational fishing in Sweden. The survey targeted the Swedish population and, consequently, the sample contained a large fraction of zero fishing days. To consider this, a zero-inflated Poisson...

TEXTE BIBLIOGRAPHIE NOTES AUTEURS ILLUSTRATIONS

TEXTE INTÉGRAL

1 In nearly any context, people are attentive and judgemental when it comes to the affairs of others. Vigilant audiences entail a range of phenomena, span geographic areas and vary in their motivations as well as their affiliations. This watching can escalate to vigilantism if audiences witness something that demands a response. We understand digitally mediated vigilantism to include practices where citizens (or digital media users more generally) are offended by other citizen actions, and retaliate through practices and repertoires that include mobile devices and social platforms

## The TRIPLE Training Series Decision Tree

To support you in finding the relevant training materials, we created a clickable decision tree. In the layer "I am" you can select via clicking on the node in which group you would see yourself (SSH researcher or support personnel or infrastructure developer). Next you decide in the "I want" which goals you have, e.g., I want... to fit EU requirements. In the next layer, the recommended training sessions are displayed (e.g., Copyright and Academia in the Digital Era); the titles of the training sessions are clickable and redirect you to the website where the training materials are available.
