Open Science Platform in Serbia

- Adopted July, 2018
- The platform is intended for all participants in research and it applies to the outputs of research projects and programmes **funded fully or in part from the national budget** of the Republic of Serbia
- Open science is principally achieved through
 - (1) open access to research publications and
 - ~~(2) open access to research data~~

Open access to research publications

- Implies the right of every Internet user to **read, download, save, print and use** the digital content of scholarly publications **free of charge** and to provide citation
- The metadata describing scholarly publications must be deposited immediately after publication in an appropriate **institutional / subject-based / national repository**
- Repositories:
 - the compliance with the international metadata harvesting protocol **OAI-PMH** (Open Archive Initiative Protocol for Metadata Harvesting)
 - metadata expressed in the **Dublin Core format**.

Open access to research data

- Open access to research data implies the right of every Internet user to download, save and distribute research data free of charge, as well as to use, modify and build upon them **without asking permission** from their creators or owners with citation
- Depending on legal restrictions and ethical standards that apply **in some research areas**, the archived research data may be
 - (1) closed,
 - (2) accessible solely to the members of a defined group or
 - (3) publicly available.
