TECHNICAL SPECIFICATIONS - INTRODUCTION

Between 30th October and 29th November 1995, the institutes listed above conducted the sixth wave of the Central and Eastern EUROBAROMETER (CEEB) on behalf of the European Commission, Directorate General X for Information, Communication, Culture, Audiovisual, Survey Research (EUROBAROMETER) Unit, in co-operation with the External Information Unit of the same Directorate-General. All requests for further information should be addressed to:

Mr. George CUNNINGHAM, External Information Unit
(T120 - 08/14)
European Commission
B - 1049 Brussels
Tel: 32-2-299.91.71 Fax: 32-2-299.92.88

Compared to CEEB5 (Autumn 1994) one more country was added, namely Croatia. All EUROBAROMETER data are stored at the Zentral Archiv (Universität Köln, Bachemer Strasse 40, D - 5000 Köln 41). They are at the disposal of all institutes which are members of the European Consortium for Political Research, of the Inter-University Consortium for Political and Social Research (Michigan) and all those interested in social science research.

DETAILS ON SAMPLING

A total of 19 countries in Central and Eastern Europe were surveyed : Albania, Armenia, Belarus, Bulgaria, Croatia, the Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Latvia, Lithuania, the Former Yugoslav Republic of Macedonia (FYROM), Poland, Romania, Russian Federation, Slovakia, Slovenia and Ukraine. In total 20.278 citizens aged 15 years and over were interviewed face-to-face in their private residences in Central and Eastern Europe as a whole. The survey was fully nationally-representative. Only in Georgia the region of Abkhazia could not be covered due to the state of war. In Croatia in some parts of the country (Slavonia, Dalmatia, Lika, Kordun, Banija) some areas were substituted by corresponding localities in the same region.

As with Central and Eastern EUROBAROMETER nos. 2, 3, 4 and 5 each institute adopted a multi-stage random probability sample design. There were slight variations in each country's sample design to take account of its individual characteristics and population structure. In each of the 19 countries (with the exception of Georgia and Croatia) surveyed, interviews were conducted throughout every region within its national boundaries.

SAMPLING POINTS

Albania	150
Armenia	100
Belarus	114
Bulgaria	181
Croatia	40
Czech Republic	193
Estonia	171
FYROM	110
Georgia	108
Hungary	100
Kazakhstan	100
Latvia	125
Lithuania	121
Poland	251
Romania	110
Russian Federation	140
Slovakia	182
Slovenia	198
Ukraine	120
TOTAL	2.614

The sampling points for each country were selected, in the first instance, via a division into its major socio-economic areas. A list of these is appended. Within each of these areas smaller electoral or administrative districts were randomly selected and, taking into account such factors as the relative size of the population living in rural and urban settlements, the number and distribution of sampling points in each of these districts was finalised.

In general ten interviews were conducted around each sampling point, with individuals being selected via one of four main methods, these being :

- (I) Double clustered random address sample + next birthday in the household
- (II) Contact randomly selected from a list of the electorate. In most cases such lists were no more than three years old.
- (III) Random selection of addresses from published, or specially commissioned lists, with individuals being selected via a Kish matrix or other random method.
- (IV) Random route from a selected starting point (often the central bus station in larger settlements) with individuals again being selected via a Kish matrix or other random method.

Quite understandably, in many instances address or electoral data was not available for the population below the age of enfranchisement, and therefore quotas were imposed to ensure that the correct number of 15-17 year olds were interviewed.

The maximum number of interviews in any individual household was one. All interviews were conducted face-to-face by fully-trained interviewers in people's homes.

In each country the final sample was representative of the adult population aged 15+ years (with the exception of Abkhazia in Georgia; the Far North and inaccessible regions of Siberia in the Russian Federation; the islands of Saaremaa and Hiiumaa in Estonia and some areas in Slavonia, Dalmatia, Lika, Kordun, Banija in Croatia).

REALISATION OF FIELDWORK

	<u>Fieldwork</u>	<u>Number of respondents</u>
Albania	13 November - 24 November	1005
Armenia	01 November - 10 November	1000
Belarus	06 November - 27 November	1045
Bulgaria	04 November - 11 November	1098
Croatia	17 November - 24 November	1000
Czech R.	01 November - 19 November	1091
Estonia	06 November - 17 November	1000
FYROM	07 November - 16 November	1000
Georgia	07 November - 23 November	1059
Hungary	11 November - 27 November	1004
Kazakhstan	07 November - 21 November	1000
Latvia	10 November - 24 November	1094
Lithuania	10 November - 18 November	1003
Poland	25 November - 28 November	1004
Romania	08 November - 22 November	1147
Russ. Fed.	02 November - 15 November	1178
Slovakia	01 November - 07 November	1173
Slovenia	23 November - 29 November	1178
Ukraine	30 October - 19 November	1199
TOTAL	30 October - 29 November	20.278

WEIGHTING OF DATA

Compared to CEEB 5, a lot of progress was made thanks to the use of an interlocking matrix age/education. This was the case for Armenia, Belarus, Bulgaria, Czech Republic, Slovakia, Hungary, Lithuania, Romania, Russia, Ukraine, Georgia.

Slovenia and Kazakhstan were also weighted in this way, but as the distribution of age did not fully correspond to the requirements; age was used on top of the matrix to guarantee the distribution.

For the countries Albania, Croatia, Estonia, Latvia, FYROM and Poland, no statistical data were available for this matrix. In these cases the weighting according to age and education was carried out separately.

It's important to notice that the weighting was done much more efficiently this year because the matrix age/education was given in advance so that the institutes had to respect this.

The overall results for Central and Eastern Eurobarometer as a whole were weighted according to each country's 15+ population.

The data for each country's population by sex, age, education and region was prepared by the participating institutes :

	POPULATION TOTAL (15+yrs)	PROPORTION OF CENTRAL AND EASTERN EUROPE POPULATION (in %)
Albania	2.702.400	1.00
Armenia	2.633.300	0.97
Belarus	7.814.759	2.90
Bulgaria	6.878.285	2.55
Croatia	3.844.000	1.42
Czech Republic	8.324.261	3.09
Estonia	1.188.775	0.30
FYROM	1.353.959	0.50
Georgia	4.042.061	1.50
Hungary	8.244.274	3.05
Kazakhstan	11.217.539	4.16
Latvia	2.051.746	0.77
Lithuania	2.842.640	1.05
Poland	29.393.330	10.91
Romania	17.813.891	6.61
Russian Federation	113.043.000	41.96
Slovak Republic	4.080.423	1.51
Slovenia	1.560.938	0.57
Ukraine	40.351.000	14.97
TOTAL	269.389.581	100 %

BACKTRANSLATION

As all questionnaires were backtranslated completely last year (CEEB 5), we limited backtranslation this year (CEEB 6) to the new questions that were added. A couple of differences were discussed with the appropriate institutes and an acceptable solution was found in all cases. For newcomer Croatia, a complete backtranslation was carried out. Hence, the results of CEEB 5 and CEEB 6 can be fully compared.

GfK EUROPE AD HOC RESEARCH

GfK EUROPE Ad hoc Research, located in Brussels, is GfK's co-ordination centre for all international ad hoc research with a turnover of over 100 million ECU in 1994. It is present in most countries of the European Union, in all former EFTA-countries, and in major Central and Eastern European countries, making 23 countries in total. Outside Europe, GfK is represented in the USA, Canada, Japan, Hong Kong and Australia. The total turnover of GfK is about 200 million ECU making it number 4 in the world. Almost all the institutes are owned by the German mother company, GfK AG, founded in 1929.

GfK, through Dr. Rudolf Bretschneider, Managing Director of Fessel und GfK Austria (1959), was one of the first western research companies to found institutes in Hungary (1989), Poland (1990), Czech Republic (1991), Slovakia (1993) and Bulgaria (1994). Agreements have been reached with companies in Romania (1995), Croatia (1995), FYROM (1995) and Slovenia. All together more than 200 researchers are employed and trained by GfK in Central and Eastern Europe.

GfK has carried out several studies for the EU amongst which are the Standard EUROBAROMETER (in Denmark since 1989), the Consumer Confidence Barometer (in Germany since 1980, in Austria, Belgium, the Netherlands, United Kingdom since 1995) and several other ad hoc studies.
